Sports Medicine Physical Therapy

Sports Medicine

Sports Medicine Physical Therapy at CHKD

As the region's only comprehensive sports medicine program dedicated exclusively to young athletes, CHKD's experienced team of pediatric and adolescent sports medicine physical therapists is in a league of its own, making it the best choice for physical therapy for young athletes ... from little leaguers with overuse injuries to scholarship athletes with torn ACLs.

More and more children are participating in sports and suffering injuries. Whether they get hurt on the court, on the field, on the mat, or in the gym or studio, our specialized physical therapy services are designed to fit their specific needs.

At CHKD, young athletes receive treatment in an unique environment with other young athletes — making rehabilitation more fun and engaging. They work with therapists who specialize in the treatment of sports injuries in growing bodies, allowing athletes to get back in action as quickly as possible.

The sports medicine physical therapy team at CHKD is dedicated to providing the highest quality care for pediatric and adolescent sports medicine injuries in young athletes throughout the region. The team works closely with your child's physician and school athletic trainers to provide better coordination of care and oversight of the athlete's return to play.
